Cell: (203) 233 - 4022 | 17 Badger Rd, Wolcott, CT 06716 (looking to relocate)

Seeking a challenging role where I can further my craft in a professional and motivated environment. I am interested in the full breadth of front-end design, with my primary focus being user experience design. I wish to create innovative and easy to use interfaces, advocating for the user, with business goals in mind.

EDUCATION

University of Connecticut *Storrs, CT May 2017*

Bachelor of Science in Computer Science, minor in Digital Arts; with honors

Coursework: Independent Study In UX Design, Web Practicum, Advanced Web Design, Typography, Design Process, and Software Engineering

KEY SKILLS

Skills: UX & UI Design, Wireframing, Information Architecture, Prototyping, User Stories, Personas, Print Design, Responsive Design, Project Management, Photography

Tools: Sketch, Figma, XD, Photoshop, Illustrator, InDesign, Origami, Principle, InVision, Marvel App, After Effects, Lightroom, Premiere Pro

Programing Languages: HTML, CSS, Javascript, JQuery, Sass, PHP, Bootstrap, Wordpress, mySQL

PROFESSIONAL EXPERIENCE

ESPN *September–December 2017*

UX/UI Design intern on the ESPN Fantasy team, aiding in the overhaul of their website and mobile experience. Involved in several projects, including onboarding, app loading screen, and email templates. Gained experience working with established design systems in a corporate environment, in collaboration with the product team.

Connecticut Digital Archive *May–August 2016*

Experienced a summer internship to practice working with clients to create marketing materials including a new logo, bookmarks, outreach flyers, and website. Required to have designs completed in a timely manner and edited appropriately through face-to-face meetings and email. Effectively communicated and showcased the design ideas of my employer and myself through my work.

OTHER EXPERIENCE

hackNY *Fall 2017*

Won "Best Hack Design" with our project Mapping The Times, which gathered popular articles from the New York Times and places them alongside a map that takes you around the world to where the biggest news is happening.
